

INTERNET OF THINGS (IOT) GATEWAY SOLUTION

Elevated customer experience and significant cost savings

Bring high quality IoT Gateways to market to help businesses quickly establish and future-proof their IoT strategy, create value, and optimize their resources.

Internet of Things (IoT) offers enterprises the possibility to transform their business using real-time and contextual insights.

Complete managed services solution

We bring to the IoT world, a managed services solution for IoT that delivers improved asset utilization, reduced operational expenses, just-in-time inventory management, elevated customer experience (near store, in-store, post purchase) and more, for industries like manufacturing, building management, healthcare, retail, and smart home users.

Secure, standards-based reference solution

One of the key enablers in building disruptive IoT platforms is the HARMAN IoT Gateway Reference Solution – A complete solution with Hardware and Software decoupled. It is secure, standards based, with modular software architecture, interoperable with 3rd party sensors and cloud platforms, with hardware flexibility, local and remote diagnostic support and pre-integrated application bundles for numerous verticals

Key highlights

- Wide variety of HW options to choose from
- OSGi Standard based modular SW implementation
- Cloud Ready
- Pre-integrated

Why HARMAN?

Shortening Time-to-Market

Shorten your time from concept to delivery using our best practices, turn-key delivery models and rich talent pool.

Cross-platform

Take advantage of our experience in multiple industry verticals and leading platforms to rapidly exploit new market opportunities.

Global delivery footprint

Our skilled, talented engineers deliver solutions to companies like yours from centers throughout the world.

Solution accelerators

Get access to leading edge innovation and best practice by using our solution accelerators and global pool of partnerships.
