

UNIFIED COMMUNICATIONS AND COLLABORATION

Paving the way for more intuitive and dynamic business operations

Connectivity for the 'new normal'

End-to-end internal/external connectivity has always been a key enabler for business continuity. But the new normal of remote working has heightened the need for reliable communications.

In the month of March alone, the total number of video calls made on Microsoft Teams grew by 1000%.

With such a sudden boom in remote operations and demand for collaboration tools, Unified Communications & Collaboration (UC&C) solution providers are now facing a new breed of challenges.

Rapidly shifting market trends

Industry-specific standards

Need for faster time-to-market

Rising demands v/s limited resources

A ready-to-use solution that can be integrated with the existing product line to enhance features and speed up processes can easily mitigate many of these challenges.

Enterprise Collaboration Suite by HARMAN

Banking on deep-expertise of UC&C solutions and vast experience in Product Engineering Services including platform and device engineering, operation management, quality engineering, and more - HARMAN can help providers co-innovate collaboration solutions that are impactful and cost-effective.

Our Enterprise Collaboration Suite is uniquely designed to augment the existing capabilities and meet requirements like faster time-to-market, customer-centricity, flexibility, and scalability.

Benefit from our value system of partnering, engineering, and co-investing in the next generation of Unified Communications & Collaboration solutions.

Leverage:

Enhance experiences with accelerated innovation

Enterprise Collaboration Suite consists of multiple solutions that can be integrated with existing UC&C solutions to enhance the overall portfolio.

CoWBoard

Collaboration Whiteboard and Chat can be easily integrated with existing collaboration solutions - cloud-hosted or on-premise - for enhanced capabilities.

- Interactive virtual whiteboarding and chat
- Drawing, text, and shapes
- Completely secure with access control options
- Multiple platforms – Android, iOS and Windows

Stanscribe

A meeting transcription and smart conferencing solution - Stanscribe - can be integrated with VoIP servers for immersive meeting experiences.

- Speech-to-text, AI, NLU
- Seamless switching between online/offline transcription engines
- Smart conferencing
- Security and cost optimization

Unite Test Framework

Improved product quality and faster time-to-market can be achieved by automating repetitive testing. Enable better predictability of results and enhanced test coverage.

- Signaling and media quality automation testing
- Modular, extensible and reusable
- Report dashboards with in-depth visibility
- Automated log analysis

HARMAN IPs across the enterprise, healthcare, automotive, and education sectors

eNOVA

An AI-Powered Voice Assistant Platform enabled with Natural Language Understanding (NLU) and high-quality speech synthesis capabilities, eNOVA can help create customizable and differentiated voice solutions tailored for specific use cases.

HARMAN Remote Care Platform (RCP)

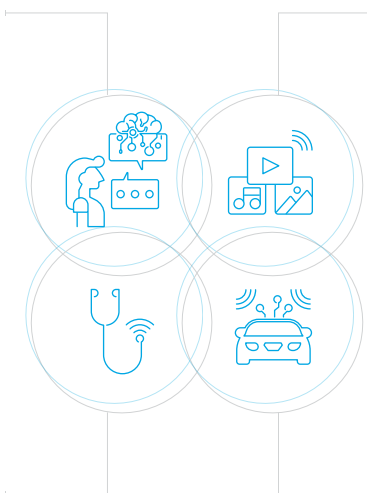

Remote Patient Monitoring can enable real-time access to health data by connecting a wide array of medical and non-medical devices. It can revolutionize the healthcare industry with voice+video capabilities to provide unified patient care and collaboration.

HARMAN Media Suite

Next-gen content management and delivery platform, HARMAN Media Suite, can complement UC&C solutions with added benefits like a corporate tube with media sharing through channels, video playback into meetings, and so much more.

Ignite Marketplace

With easy deployment and management of new cloud applications and services across automotive cloud platforms, Ignite Marketplace accelerates the process of launching new solutions within in-vehicle systems.

Multi-level value addition

R&D/QA/Testing/Engineering

Reduce cost and shorten operation cycles with advanced Product Engineering Services

Corporate IT departments/ITO/Operations

Outsource managed services to amplify the capabilities of UC&C solutions rapidly and seamlessly

Industry leaders

Generate new revenue streams with fast launches and climb up the adoption curve
